RIVARESTORE
Made in Italy

Spare-parts Rivarossi 1:80

103532

Material: rubber
Processing: black rubber

Notes construction techniques and quality

Adhesion rings for drive wheels 21,0 - 23,0 mm diameter, for locomotive E 428; Gr. 691; E 231 SNCF and others. Use a screwdriver and rotate several times under the ring to spread the rubber well on the surface of the rim, avoiding different thicknesses on the diameter.
